ActionScript

ActionScript is:

- the programming language for the Adobe Flash Player run-time environment.
- executed by the *ActionScript Virtual Machine (AVM)*, which is part of Flash Player.

ActionScript code is compiled into bytecode format. It is called ActionScript bytecode (ABC).

Manual actionscript 3.

3 ECMAScript ActionScript 3.0 Specification is based on the ECMAScript 4th edition specification. For those familiar with a flash child environment, it needs to be mentioned that very important changes were introduced in the ActionScript language between version 2 and versions 3. This is Part because the authorship environment allows you to define contents and basic actions without having to worry about the code. We are not experts. This means that you have the possibility to divide your code into specialized classes instead of writing a single program of 3,000 codiglo lines. This specification can be viewed at the ECMAScript organization wiki. 6 Features 7 Pages Related 8 Crédos This tutorial was for a good written now in which Marielle Lange (ruined) was visiting colleague at the School of Mathematical and Computers, Heriot-Watt University (Edinburgh, United Kingdom).
